PITCH DECK

INTRODUCTION

GameSol is an online multiplayer Robot war game based on the Sui blockchain. Players can play as a Robot in a game where an individual team is trying to kill other Robots or the team . The mis - sion of the team is to save or acquire the base station on the distant planet to make the team win. The winning team and/or an individual player can win rewards and NFTs set based on the online game room.

WHY GAMESOL?

We at **GameSol** are working toward meeting **Sui's** performance in creating a platform for the fastest growing Play2Earn game. Our mission is simple, to create entertainment for the players and generate revenue with many players playing together online. The scalability of the game is unlimited as the open maps, and distant planet war theme gives us the opportunity to expand at the thought level. With the next 6 months of development, we are planning many up-market features and usability cases for the entertainment industry.
